

KIDS ART CLUB

In June for five weeks, we will be exploring the artistic world of Andrea Armstrong. Armstrong is a talented artist residing in East Vancouver, Canada. Armstrong leads a captivating and creative lifestyle that revolves around three essential pillars: eating, sleeping, and painting. Her cozy studio serves as her personal sanctuary, where she immerses herself in the artistic process day in and day out. Not only does she indulge in daytime artistic sessions, but she also finds solace in late-night creative endeavours.

As an artist, Armstrong is particularly drawn to character-driven paintings. Each face she carefully crafts tells a unique and captivating story.

Armstrong's artistic journey has been profoundly influenced by her diverse upbringing in three distinct locations: rural small-town Indonesia, Manitoba, and cosmopolitan Singapore. Each of these experiences has left an indelible mark on her artistic expression, resulting in a vibrant and expressive palette of colours and themes. Her choice of colours reflects the richness and diversity of her background, creating visually stunning works of art.

While Armstrong is proficient in various artistic mediums, she finds true fulfilment in working with oils. The versatility and depth of oil paints allow her to fully manifest her artistic vision on the canvas.

In line with Armstrong's preference, we will be using oils to capture our own vivid and enchanting mandrakes during this creative journey. It's important to note that these paintings will require a month to fully dry at home, but they will provide the children with an invaluable opportunity to work with a popular classic medium and experience the magic of oil painting.
